

Country Gentleman

THE MAGAZINE FOR BETTER FARMING—BETTER LIVING

EDITORIAL INDEX
to
VOLUME CXXII

1952

PUBLISHED BY THE CURTIS PUBLISHING CO
PHILADELPHIA 5, PENNSYLVANIA

HOW TO USE THIS INDEX

This Index has been organized so that you can quickly locate information on any of the wide range of subjects included in the pages of *Country Gentleman* during 1952. Only in this book will you find such a comprehensive index. The agricultural specialist, student, librarian, or marketing executive will find it a valuable work of reference on farming in all its phases, leading to as reliable a body of current agricultural information as exists anywhere.

In addition to the articles and departments on practical farming and trends of significance in agriculture, the Index also classifies all the *Country Living* material, fiction, and even the signed art

and photographs which appeared in *Country Gentleman* during the 12 months.

The size of this Index indicates the sheer bulk of editorial material—totalling more than one million words—that *Country Gentleman* supplied its readers in one year. All of it was published only after careful sifting through the critical judgment of the editors, who assayed it for accuracy, authority, timeliness and practicality—also for qualities of interest and readability.

The entire contents of the 12 issues are thoroughly cross-indexed and classified so that any item can be easily located.

You Can Locate Items in Either of Two Ways

1. If you want to find a *specific item*, you can find it classified by title, by author, or by subject. Each item is listed in all three ways alphabetically.

Example: To locate the article, "Your Greatest Opportunity is Grass," you can find it under "Y" (first letter in first word of title). If the exact title cannot be recalled, you can locate the item under the author's name, "Myers, Will M." if neither title

nor author can be recalled, the article can be found under the general subject classification "Grasses."

2. If you want to find several or all the items published on a *broad subject*, you can find the general subject listed alphabetically.

Example: To locate any or all the articles published during the year on "House Decoration," look for this subject under "H" in the Index listings.

Inquiries are welcomed about any of the material which this Index catalogs. Address communications to the Editorial Index Editor, *Country Gentleman*, Independence Square, Philadelphia 5, Pa.
